Our Mission

UGS' Community Relations Program supports regional initiatives that bridge the digital divide and develop relationships that prepare individuals to lead productive and fulfilling lives. UGS is well known for providing excellent PLM products and services to thousands of customers allowing them to transform their process of innovation. These products and services are developed and provided by extraordinary teammates who make their time and talents available to connect with the neighborhoods in which we work and live. This involvement means more than just financial or in-kind contributions. UGS teammates nurture a spirit of innovation and serve as catalysts for positive change in our Global Communities.

These activities build positive relationships with existing and prospective customers and community leaders. They also enhance UGS' image as a corporate citizen, promote positive employee morale and provide added community value through leveraged partnerships. UGS teammates work with local citizens and nonprofit organizations to design technology solutions that address specific problems. Our PLM technologies help organizations to provide better services, minimize costs, add effectiveness and promote innovative growth.

Our Community Relations Programs are based upon a strategy of global presence with local ownership. We focus on greatest needs by supporting programs that are important to our customers and teammates in their communities. Even though support is provided for national and international programs, we encourage improvements to local communities where UGS teammates and customers live. Some examples of UGS Community Relations initiatives are presented in Section III of this information pack for your reference.

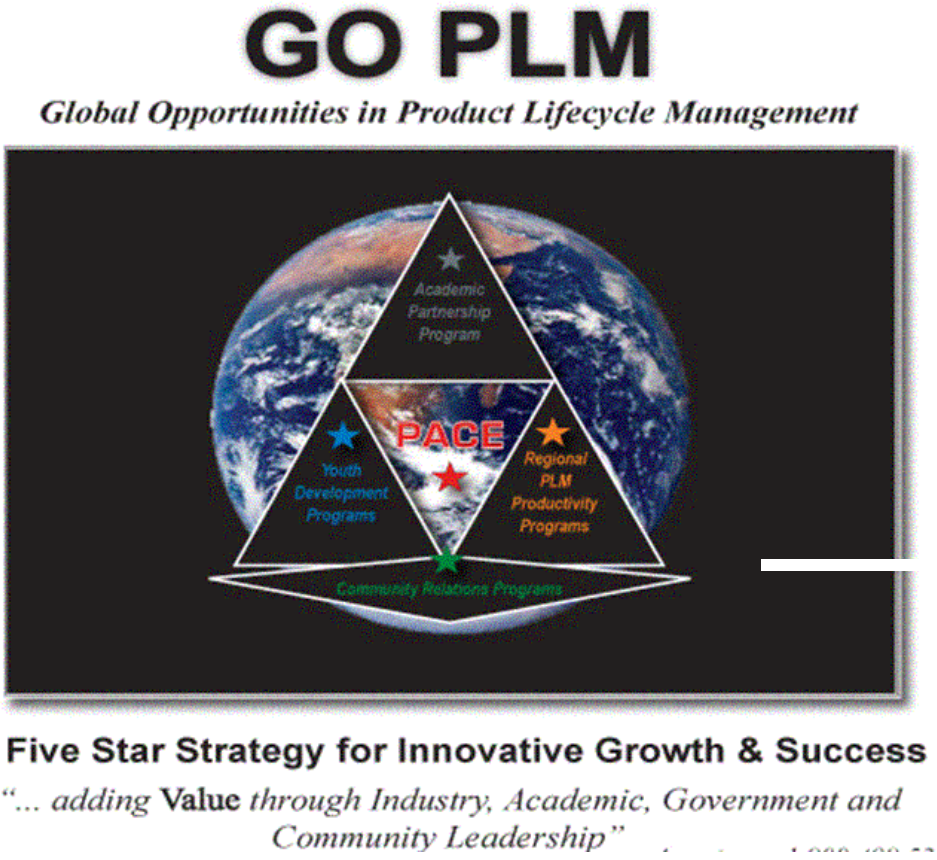

GO PLM Program

Global Opportunities in Product Lifecycle Management

UGS' GO PLM initiative leads the industry in the commercial value of the in-kind grants it provides and brings together four complementary community involvement programs focused on academic partnership, regional productivity, youth and displaced worker development and the PACE (Partners for the Advancement of Collaborative Engineering Education) program. GO PLM provides PLM technology to more than 800,000 students yearly at nearly 8,000 global institutions, where it is used at every academic level – from middle schools to graduate engineering research programs. For more information on GO PLM and the partners and programs it supports visit http://www.ugs.com/partners/goplm/.

UGS develops and nurtures GO PLM that provide significant added value for academic institutions, youth development programs and global communities. A five star approach is used to facilitate continuous improvement and PLM industry leadership including:

- Academic Partnership Program
- Youth Development Programs
- Regional Productivity Programs
- PACE
- Community Relations Program

Grant Application

Approved Grant Programs are channeled directly into UGS teammates' communities providing positive change, empowerment and local ownership.

Applying for a UGS Community Relations Grant:

All grant applications must be made in writing. Grant seekers are advised to submit a Community Relations Grant Application. *See Page 6*

When submitting an application, the following items must be included:

- A description of the organization e.g.: Name of the Institution, Address, Contact Name and Contact Information, mission of the organization.
- Documented plans describing how the grant will be used at the organization and the community program for which the software/hardware/cash will be used.
- Any special factors that should be considered in evaluating your application and the programs' probability of success etc.
- All Grant Applications are evaluated on a competitive basis and must be approved by Regional UGS Executive and GO PLM Corporate Executive.
- Completed Grants should be sent to bijy.vattathara@ugs.com or fax to 314-264-8930.

Grants are not available to/for:

- Individuals
- Political parties, campaigns or causes
- Courtesy Advertising
- Religious or fraternal groups whose projects primarily benefit their members or adherents
- Volunteer Emergency Squads
- Fund-raising events
- Annual Meetings
- Capital Campaigns
- Film and Video Projects
- Program Advertising
- Travel
- Programs Outside UGS Community

GO PLM Community Relations Grant Application

UGS supports the Global Communities and desire to add value through industry, government, community and academic partnerships. In addition to these, we offer the latest, state-of-the-art CAD tools in their curriculum. Every quarter, UGS GO PLM Program awards software, hardware and cash grants to highly qualified institutions based on applications received during the quarter. Factors such as Institution size, community program content, program exposure, community impact and financial needs are taken into consideration. If you are interested in a Community Relations Grant, please fill out the following information and submit it to Hulas King at hulas.king@ugs.com Faxes may also be sent to Hulas at 314-264-8930.

Institutions Name, Address & Phone Number: University of North Texas
P.O. Box 311250
Denton, Texas 76203-1250 Ph. (940) 565-4550

Contact Name: Thomas Fitzmaurice

Contact Title: Director of Development, College of Engineering

Department Title: (Same)

Email Address: fitzmaurice@unt.edu

Please provide a description of your Institution. Include the number of students, current software packages used, analysis or manufacturing tools used, which software modules are requested and how many seats for each Product Bundle.

The University of North Texas works cooperatively with UGS on a number of fronts. UGS is a board member of the College of Engineering, where a scholarship has been set up in the name of Dr. Oscar Garcia.

How do you plan to implement the requested capital (software/hardware/cash)?

$4000 scholarship to a deserving College of Engineering student.

In which community program will the software/hardware/cash be used? Please include how many individuals will benefit from this grant yearly.

The grant will be part of a foundation that serves one or more students yearly.

Who will serve as the point of contact and what commitments will your program make to ensure overall success?

Craig Berry will serve as UGS point of contact and will follow-up on award success.

Please provide any other factors we should consider in evaluating your Institution for a grant, i.e., financial need, community need, and youth career development etc.

1. College of Engineering Board Membership
2. Explicit Diversity-oriented Mission of the Institution

Will a press release be generated to acknowledge this Grant?

No.

UGS' top Community Relations Programs include:

Community Partnerships

Charitable Giving

In-kind Grant Programs

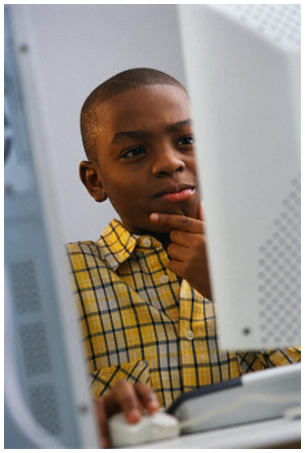

Economic Development

Family Enhancement

Volunteers in Action

Academic Partnership Program

Arts & Culture

Community Partnerships

UGS supports cultural, civic, environmental and economic development organizations. These community partnerships are made up of many locally owned, regionally managed Teams at more than 36 regional sites around the world. A few examples include:

Bijy Vattathara & United Way St. Louis Representative

United Way

The United Way unites people of diverse backgrounds and interests who work together to strengthen a wide range of health and human services in the community. In 2002-2003, United Way chapters across the U. S generated an estimated $4.4 billion and mobilized more than a million volunteers to help America's communities address their most critical issues. United Way is about improving lives through the caring power of community. You never stand as all as when you reach back and help someone less fortunate than yourself to achieve success. With the help of UGS Employees, the United Way Campaign 2004 & 2005 was a great success. A Grand Total of $198K was collected and awarded to 16 United Way Offices across the US.

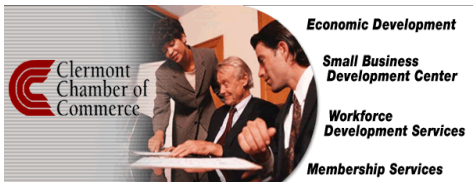

Diane Seeks & United Way Huntsville, AL Representative

Tom Rocklin & Ruth Lung

Greater Cincinnati Community Affairs Council

Employees in the Milford office of UGS have come together to establish the UGS Greater Cincinnati Community Affairs Council (GCCAC). The purpose of this group is to provide community organizations and employees with a process to request and receive support for community activities. The GCCAC manages community fund raising programs such as the United Way Campaign and provides support to employee-sponsored community activities. All employees are welcome to participate in the GCCAC's on-going activities and in specific community projects. All funds raised locally are dedicated to projects brought to the GCCAC region by employees. The "Council" enlisted the help of UGS employees to establish its funding priorities by voting on the types of projects employees believe should receive the highest priority and level of support from the GCCAC. The GCCAC is unique to the Milford office and is the first effort of its kind within UGS.

The GCCAC Is Organized Into Four Committees

- *Community Liaison Committee*

Builds relationships between UGS and community-based organizations such as the Clermont County Chamber of Commerce and the United Way of Greater Cincinnati.

- *Employee Involvement Committee*

Accepts requests from employees for support of community and charitable activities and projects. This group also recruits volunteers to participate in community activities and conducts fundraisers to support employee-sponsored projects.

- *Project Management Committee*

Manages the GCCAC schedule and resources. It recommends the level of support each proposed project should receive.

- *Communications Committee*

Focuses on communicating GCCAC news to employees and to the community.

Employees donated more than enough food for ten families. GCCAC purchased $25 gift cards for each basket so the families could purchase a turkey. We donated the food not used in our baskets to the Milford fire department's Thanksgiving food program. As always ... generosity of UGS employees is fantastic!!!

GCCAC members preparing Thanksgiving baskets

Southern Ohio TopSoccer

UGS hosted a group of soccer players from the Southern Ohio TopSoccer League at the UGS suite in Paul Brown Stadium. The U.S. Women's Soccer team was in town to play an exhibition game against New Zealand in what may have been a farewell tour for many of our U.S. women champions. It was an awesome, once in a lifetime experience for the kids, whose faces say it all!

TopSoccer is a soccer league for children and young adults with mental and physical disabilities. Dimitri Mavriplis, a UGS teammate whose son plays on the team, has been coaching in the league for the past three years. Dimitri says “this as one of the most rewarding experiences of his life. To see the kids improve after every practice and every game, and to witness their joy and sense of pride from scoring a goal is very fulfilling. Even more amazing is their sense of camaraderie and sportsmanship. The kids played for the love of the game, and they hung on to every moment as the U.S. team won 6-0. It was a wonderful and memorable treat for all of them including their coach. Thank you UGS!"

Cincinnati, OH

Charitable Giving

UGS has a corporate responsibility to our global communities. Although volunteerism is the centerpiece around which all other activities are leveraged, UGS contributes to the communities in a variety of other ways, including cash, equipment, and in-kind software grants among other offerings. These contributions come from UGS teams and organizations that have budgeted or raised money through various events for charitable giving. UGS organizations that make charitable contributions follow established corporate guidelines and work with their local Community Relations representatives where applicable. Our employees volunteer thousands of hours each year to causes important to them, their families and local communities.

Disaster Relief Donations

In reaction to the tragedy in Asia and East Africa, UGS provided funding for disaster relief efforts. Dan Malliet, Sr. VP of HR recently announced that "UGS and UGS employees provided $172,000 in support of the Katrina relief funds. "Our employees continue to be directly involved with various relief efforts through local organizations and personal efforts".

Countries most directly affected by the 2004 Indian Ocean earthquake.

CAASTLC

UGS was pleased to join in CAASTLC (Community Action Agency of St. Louis County) organization's worthwhile efforts in supporting less fortunate families in our business community during the holiday season of 2004. Eight families were adopted from CAASTLC formerly known as S.T.E.P., Inc. Through the generous spirit your contribution made a difference this fortunate individuals seeking to improve their lives and make their contribution to others as well.

Live Oaks Career Development Center

Live Oaks serves over 400 High School Juniors and Seniors in Southwest Ohio. UGS sponsored Live Oaks to enter the FIRST Robotics Competition. The Solid Edge program is used by the school's Robotics Team to design.

PWC Greater Cincinnati

Five members of the UGS IT team spent the day volunteering with People Working Cooperatively (PWC) annual "Prepare Affair" event. During the day, the team visited six houses in the greater Cincinnati area and prepared for winter by raking leaves, cleaning yards, cleaning gutters, inspecting doors, windows, roofs, checking on the house's smoke detectors, carbon monoxide detectors, hot water, heat and electricity.

PWC is a non-profit organization in Cincinnati that performs home repairs for elderly and disabled homeowners who are not able to afford the services otherwise. To qualify for PWC services, household income cannot exceed $11,500 per year. PWC hold two annual volunteer events: "Prepare Affair" in the fall and Repair Affair in the spring (more substantial home repairs such as news roof, new gutters, structural damage repair, HVAC work, etc.), in addition to their normal 365-day operation. PWC exists on private donation, private grants (United Way) and government grants.

UGS IT Participants: Eric Broyles, Dave Isenhower, Jeremy Louis, Lanette Poe and Nick Ritter

Certification Program

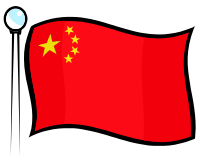

UGS' NX Certification is an integral part of the UGS Global Certification Strategy to prepare students to enter the workforce and accelerate their contributions to customer's productivity. In the PLM space, companies are beginning to see the need to first train and then measure the knowledge and skill of their workers in order to get the maximum benefit from their investment PLM tools. Automotive industry customers are looking for every advantage they can find in choosing their PLM tools. Having skilled workers, and a mechanism to ensure their workers are skilled, means higher productivity levels. The UGS Global Certification Strategy helps to meet those needs.

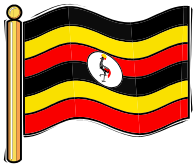

Shanghai, China

Tallin, Estonia

Nanjing, China

Uganda

In-kind Grant Programs

UGS supports our Global Communities by adding value through industry, government, community and academic partnerships. In addition we offer the latest, state-of-the-art PLM tools for use in curriculum based courses. Every quarter, UGS GO PLM ™ Program awards software, hardware and cash grants to highly qualified institutions based on applications received during the quarter. Factors such as institution size, community program content, program exposure, community impact and financial needs are taken into consideration.

We provide Grants for:

- Seed money (one time grants) for new programs or projects that address community needs and priorities.
- One-time grants to buy equipment, improve facilities, or enable special projects.

F1 in Schools Inc.

UGS and F1 in Schools Inc. announced that they have joined together to create a fun and motivating environment for students to explore PLM engineering processes by researching, designing, manufacturing and ultimately racing their own scale model.

Economic Development

UGS works with industry, government and community leaders where we do business to improve the quality of life in those communities-their educational, cultural, economic and social well being – and seek to provide training and opportunities for displaced workers and youth from disadvantaged backgrounds. Some examples include:

TechSolve, Ohio

TechSolve, experts in solutions for lean manufacturing, machining, consulting and supply chain development received $3 million Software Academic Grant from UGS. PLM Solutions line of business granted the two different leading software applications, Unigraphics® and I-Deas®, to enable TechSolve to upgrade it's Computer Integrated Manufacturing (CIM) capabilities and better serve and communicate with incubator based small to medium size manufacturing companies. "This leading edge PLM software will have a real positive impact in improving the technical stature of small to medium size enterprises." said Michael Gugger, Manager of Special Projects, TechSolve. http://www.techsolve.org/

VBDR (Virginia Biosciences Development Center)

UGS and the VBDC continue collaboration in supporting the medical device entrepreneurs of central Virginia with proprietary I-Deas CAD/CAM software to assist start up companies in the Park's incubator with the development of medical devices. http://www.vabiotech.com/

HKPC (Hong Kong Productivity Council)

The Hong Kong Productivity Council (HKPC), Hong Kong Auto Parts Industry Association (HKAPIA), and Society of Automotive Engineers-Hong Kong SAE- HK), visited Focus: HOPE and UGS, to promote international productivity among automotive suppliers using UGS' PLM products. http://www.hkpc.org/

Hong Kong Productivity Council 香港生產力促進局

YCIT (YanCheng Institute of Technology)

UGS, and YanCheng Institute of Technology (YCIT) announced a joint venture to set up an independent UGS College at the institute to integrate UGS® software into its curriculum for all undergraduate mechanics students. In support of the new institute and its expanded training goals and automotive focus, UGS is providing YCIT with an in-kind grant of UGS' NX™ software and Technical support with a commercial value of US $73 million. http://www.ycit.edu.cn/

Manufacturing Training Alliance, St. Louis MO

MTA received software and hardware from UGS Corp. to fully implement their CAD Lab and the Engineering Bridge Program. This is a collaborative project with the National Society of Black Engineers St. Louis Chapter. This grant provided disadvantaged youth and adults the exposure to state-of-the-art 2D and 3D modeling software to gain meaningful employment and support their families.

The CAM Class Bob Voegele (MTA-Recruiter), Jacob Johnson (MTA-President)

Hongik University

GM Daewoo Auto & Technology Co. and its PACE partners recently provided educational supplies and technical training for automotive planning, design and engineering to Hongik University. The in-kind contributions are worth nearly $212 million.

Sang Jun Sim (Terry) of GM Daewoo and Hyeong Woo Choi of UGS-Korea

All Speakers at the PACE/Hongik University Rollout—Exec. Of PACE—Daewoo and GM

RCGA (St. Louis Regional Chamber Growth Association)

Scott Bell & Bijy Vattathara

Scott Bell, VP UGS Global Sales recently joined the RCGA (Regional Chamber Growth Association). This is a Public Policy Council that develops the legislative program for the St. Louis regional business community, focused on creating jobs, business expansion, and stimulating economic growth.

Greater Dallas Chamber of Commerce

GREATER DALLAS CHAMBER

Mendi Paschal attending the conference

Ten teammates from UGS Plano facility participated in The Greater Dallas Chamber 2005 Women's Business Conference, featuring Goldie Hawn as a keynote speaker. The Greater Dallas Chamber promotes economic opportunities for all women entrepreneurial, professional and corporate. The Chamber is turning the challenges facing working women into unlimited opportunities through programs that educate, inform and provide access for business development as well as professional and personal growth. This annual one-day conference and networking opportunity is structured for business women in the metropolis area.

Michigan Tech –Challenge X

The General Motors Corporation (GM), the U.S. Department of Energy, UGS Corp. and other government and industry leaders have developed Challenge X: Crossover to Sustainable Mobility. This ground-breaking, three-year competition will provide engineering schools an opportunity to participate in hands-on research and development with leading-edge automotive propulsion, fuels, materials, and emissions-control technologies. Seventeen teams will re-engineer a GM Equinox, a crossover sport utility vehicle to minimize energy consumption, emissions, and greenhouse gases while maintaining or exceeding the vehicle's utility and performance.

CHALLENGE X .org
CROSSOVER TO SUSTAINABLE MOBILITY

Family Enhancement

UGS provides a forum for families interested in supporting effective collaboration between individuals, family units, the company, and the communities in which they live. These activities promote Family enrichment and also give individuals an opportunity to offer feedback and get involved in ways that are meaningful to them for the purpose of identifying activities and solutions for promoting literacy, raising Community achievement and supporting equity and achievement.

Father Dunne's News Boys' Home

Father Dunne's News Boys' Home seeks to provide young men and their families' individualized care addressing their unique needs and building on their strengths through the Wraparound Process. http://www.fatherdunnes.com/

St. Vincent Home for Children

Their mission is to provide love, security and professional treatment for troubled children and their families through a fully integrated program of services. http://www.saintvincenthome.org/

UGS-China Annual Family Party

SEM Haven Health & Residential Care Center

A multi-disciplinary team involving Activities, Social Service, Dietary, Rehab, and Nursing personnel interact with family members and residents to develop a plan of care most appropriate to address the challenges each resident is facing. http://www.semcommunities.org/haven/

Focus: HOPE

"Focus: HOPE is a nationally recognized civil and human rights organization in Detroit, Michigan. Our mission is to use intelligent and practical action to fight racism, poverty and injustice" said Eleanor Josaitis.

On September 26, Ed Arlin, Hulas King and 2 of our UGS Diversity Council members, Lori Klebba of the Ford Program Office, Allen Park, and Françoise Sudres-Kovac of the Global GM Account, Livonia, visited the Focus: Hope Organization headquarters in Detroit.

UGS Corp., a leading global provider of product lifecycle management (PLM) software and services, announced the charity premiere of "A Car is Born" on Monday, November 7th at Detroit's Fox Theatre benefiting Focus: HOPE. "A Car Is Born" is the first television documentary to cover the history of the product development process in the automotive industry. The documentary is produced by Blue Sky Productions' John McElroy, host of the television program "Autoline Detroit." "John McElroy has created a unique perspective in showcasing the rich history of the evolution and making of the automobile," said Eric Sterling, vice president of automotive marketing for UGS. "UGS is a long time supporter of Focus: HOPE and we truly believe in the work of this notable charity organization. We look forward to lending a helping hand to Focus: HOPE and hosting the premiere of a documentary that will broaden the understanding of how much really goes into the building of an automobile." Focus: HOPE is honored to be the chosen beneficiary of proceeds from "A Car is Born" premier. The combination of UGS, a major automotive technology provider, with Focus: HOPE represents an ideal relationship," said Eleanor Josaitis, CEO and co-founder, Focus: HOPE.

Eric Sterling, VP of automotive marketing for UGS & Eleanor Josaitis, CEO and co-founder, Focus:HOPE

SSM Cardinal Glennon Children's Hospital Footprints Program

The FOOTPRINTS staff is committed to providing the highest quality of care for these children and their families, regardless of the site of care. A plan of care, called an advanced care plan, is developed with an interdisciplinary team of care providers and the family. This meets the physical, emotional, and spiritual needs of the child and family and is consistent with family values, preferences and goals. The care focuses on the comfort of the child, is ethically sound, continuous and community based, and facilitates the highest quality of life until the child dies. http://www.footprintsatglennon.org/

Master of Ceremony: Malcolm Bridge with GO PLM Team: Tavia Carson, Bijy Vattathara and Charrell Petty

International Justice Mission (IJM)

International Justice Mission is a human rights agency that rescues victims of violence, sexual exploitation, slavery, and oppression. UGS had the opportunity to support the freedom of having basic human rights and to liberate children who are sold into bonded slavery and prostitution. For more: ***http://www.ijm.org.***

These are the free hands of a former slave. Nagaraj is one of 138 rescued from slavery in a brick kiln. As a free man he and his family now own and operate their own brick kiln and employ others with good work.
(Photo & Story Credit: International Justice Mission®)

Yabu and her daughter Malepo (8) meet with IJM staff and local partners to register Malepo for Thai citizenship papers necessary for their family's work outside the village, higher education and government sponsored medical care.

INTERNATIONAL JUSTICE MISSION®

Arts & Culture

UGS not only supports libraries, museums, and other cultural institutions in interesting partnerships that leverage UGS teammates expertise, but also demonstrate the critical role PLM technology plays in improving the arts. UGS supports visual and performing arts organizations, theatres, symphonies, museums and other cultural organizations and activities that contribute to a thriving and diverse community.

East Carolina University

Under the direction of Dr. George Bissinger of the ECU Department of Physics, this project which is supported by a National Science Foundation development grant (DMR9802656,1998-2002) called VIOCADEAS (VIOlin Computer Aided Design, Engineering, Analysis System) --and organized around the UGS program I-DEAS® (incorporating parts design, finite element, boundary element method, coupled vibro-acoustics and sound simulation modules, as well as control interfaces to VXI data acquisition systems). http://www.ecu.edu/physics/George.htm

LTU (Lawrence Technological University)

Last summer 17 Lawrence Technological University students and three professors– from technical communications and humanities, to civil and mechanical engineering majors – will paddle from Detroit to Pittsburgh to commemorate the 250th anniversary of the French and Indian War and Braddock's Battle on the banks of the Monongahela River. Using Solid Edge® engineering design software, a canoe-building book, Internet research and notes from a meeting with Chicago master canoe builder, Ralph Frese, means created the canoe's long, lean design.

Friends of the Huxley Public Library

The Huxley Public Library serves the entire community of Huxley and the Ballard School District. UGS donated gifts to Huxley Library to be used as prizes for the Friends of the Library's Bingo Tent during Huxley's Prairie Fest. The money raised from the Fest will be used to purchase additional books and other media and supplies for the library.

Volunteers in Action

Thousands of our teammates donate their time and expertise in support of non profit organizations throughout their individual regions providing a global presence with local ownership. The "UGS Volunteers in Action" program promotes volunteerism, improves the quality of community life and recognizes and enhances UGS Teammates. Activities in this area courage personal and professional growth through employee volunteerism.

Some major Volunteer programs during CY 2004 & 2005 included:

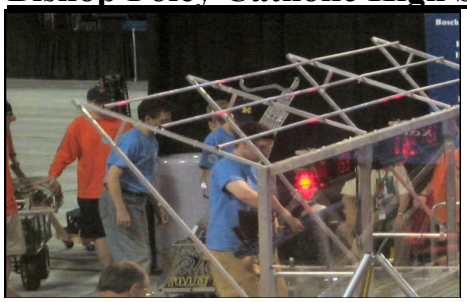

Habitat for Humanity, Long Beach CA

UGS' volunteers collects inkjet/toner cartridges and recycle through GreenFundNetwork.com partnership, where every cartridge they recycle will earn money for Habitat for Humanity.

Habitat for Humanity Greater Los Angeles

GreenFund Network
MAKING A DIFFERENCE...ONE CARTRIDGE AT A TIME

Bishop Foley Catholic High School, Madison Heights MI

UGS and Bishop Foley C.H.S announced a $4 M partnership to provide world class PLM software for high school students.

Children Affected by Aids Foundation (CAAF)

UGS helps CAAF to support programs throughout the country that meet the day-to-day needs of more than 100,000 children in the US who are infected with HIV or affected by AIDS by the illness or death of a parent (s) or sibling.

CAAF
Children Affected by AIDS Foundation

Detroit Trackers Midget Major 'AAA' Hockey Program

UGS provided the Midget Major Team, for players 18 and under, a grant to assist the organization in defraying some of the travel and equipment costs. The Detroit Trackers AAA hockey club philosophy is to invest in our children and to develop young men and women into productive, healthy and strong citizens through participation in after school youth hockey where the emphasis is school first and athletics second.

The Christian Activity Center & Pilgrim Baptist Church

GO PLM Team & Jimmie Gaines

The computers received from UGS assists individuals who are underserved by a limited access to technology and the IT skills need to fully utilize technology to improve their own opportunities. This will be used to implement a program aimed at attracting the youth into rewarding technical careers.

Teen Response, Cincinnati OH

UGS provided software and hardware with a commercial value of US $118,000 to Teen Response providing services to help older children and youth, to become involved in many aspects of community life: political, environmental, social involvement and social leadership. Teen Response, Inc. is a non-profit organization providing a variety of services for adolescents who have an interest in taking age appropriate responsibility for their world. John Keuffer, Executive Director of Teen Response said, "We look forward to forming a closer corporate relationship with UGS and the opportunity to leverage their support in our youth programs. This grant is very exciting news, particularly in the face of recent budget cuts from the City of Cincinnati. It also sends a strong message that our program is making a name for itself across the country."

For more information: http://www.teenresponse.org

ESTIEM (European Students of Industrial Engineering & Management)

The contract was signed at UGS' customer event "Open House 2005" by Naomi Tolhuizen, President of ESTIEM and David Punter, EVP Executive Operations, Matien Merks, VP and MD Benelux and Frans Adamowicz, Marketing Manager Benelux of UGS. This was announced at the ESTIEM council meeting in Lyon (France) Aims of the vision of cycles project. Through this sponsorship ESTIEM will fund its Vision Project.

Martien Merks VP & Managing Dir. UGS Benelux, David Punter Ex. VP UGS Corp. Executive Operations, Naomi Tolhuizen, President ESTIEM, Frans Adamowicz, Marketing Manager UGS Bebelux

NAIT (National Association of Industrial Technology)

UGS Corp. sponsored an Industry tour of St. Louis UGS facility to the National Association of Industrial Technology (NAIT), an academic accreditation body that ISU belongs to in the last Fall during the NAIT Convention held in St. Louis. This tour outreached and developed a relationship between UGS and NAIT. NAIT visited St. Louis offices and training rooms, and treated with an overview of the PLM strategies, including UGS product overviews and demonstrations prepared by David Nance and Jason Bunge. More information on: http://www.nait.org/

Thomas Spotts, Ball State University & Bijy Vattathara, UGS Corp. at NAIT Convention

GO PLM Team: Charrell Petty, Tavia Carson & Bijy Vattathara preparing for the NAIT convention

The Leukemia and Lymphoma Society

Lisa Portune ran the full 26.2 miles of the Cincinnati Flying Pig Marathon in honor of their daughter Erin and to raise money for the Leukemia and Lymphoma Society. Lisa raised over $3,200 this year, including a gift from UGS.

UGS was represented in the 3rd Annual Leukemia Cup Regatta (a series of sail boat races). This year UGS agreed to sponsor the boat Winsornaut, a Capri 27 owned and kippered by Steve Smith, Thumper Smith's (UGS employee) big brother.

Racing for Leukemia
Lisa's Marathon Run for Erin

Presentation of UGS check to Judie Mitchell, Exe. Director of the Southern Nevada Chapter of the Leukemia and Lymphoma Society

UGS was honored for support of the Great Lakes Yacht Club by fund raising Chairman Tom Verbeke and Co-Chair Barnie Mathie at their annual meeting. Great Lakes Yacht Club has been instrumental in raising over $250,000 for the society with the annual Leukemia Cup Regatta held early in the spring sailing season on Lake St. Clair, just east of Metro Detroit. A strong team of volunteers including UGS teammates supported this successful 2 day event.

Professional Affiliations

UGS is a leader in active partnerships with Professional Affiliations. Our goal is to facilitate participation by UGS teammates in organizations that add value through Industry, Government, Academic and Community Leadership. UGS teammates currently serve on over 120 active Professional Affiliations primarily at an executive or board level. We prioritize recommendations in this area quarterly to maximize UGS' Global presence with local participation and ownership. A listing of current Affiliations include:

Academic Partnership Program

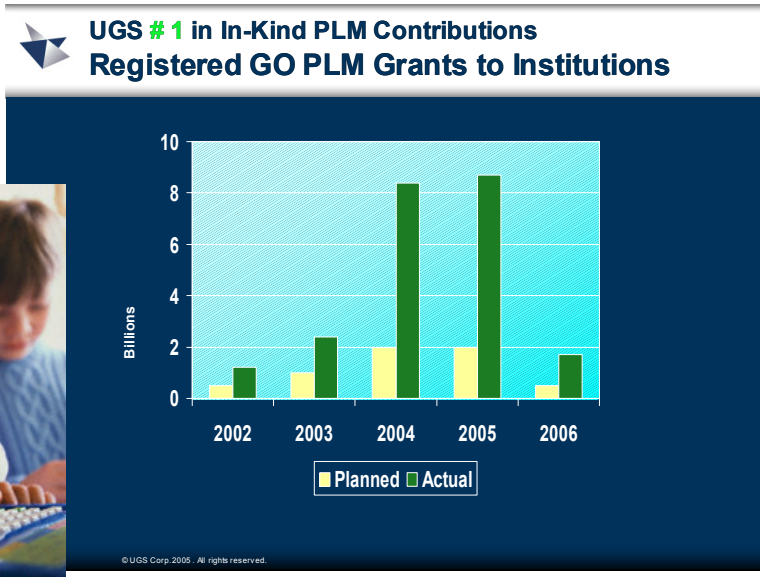

Improves the technical stature of academic institutions and their ability to develop PLM top-notch engineers and technologist for our communities, clients and business partners. The UGS Academic Partnership Program is the most comprehensive of its kind, serving over 845,419 students yearly at 8,243 global institutions. UGS is unique in the PLM and CAD/CAM/CAE industries offering software to schools that can be used at every academic level – from middle schools to graduate engineering research programs. These tools are ideally suited for your engineering, engineering technology, manufacturing, industrial design and design and drafting programs.

Recognition Awards

UGS leads the PLM Industry in receiving special awards and recognitions for GO PLM related initiatives. In addition to empowering innovative growth opportunities for Global citizens, our Industry, Government, Academic & Community Partnerships are reflective of the coming spirit on which we strives today.

*New Mexico State University Award

*ABET Leadership Award

*AMIE Advantage Award

*Ugandan Presidents Award

*CIEC Leadership Award

*NETEC ***PLM Knowledge 21*** Recognition

*Top Supporter of Diversity Awareness Award

*ISU Order of the Knolls Award

*National Association of Manufacturer's Award

*Tuskegee University Industry Leadership Award

*AMIE Appreciation Award

*RCGA Leadership Circle Award

*Hongkik University PACE Award

*AMIE Diversity Awareness Award

*Plano Chamber of Commerce Award

Ugandan Manufacturing Association Award

*UGS/Tenlinks Grant Program

*NSBE Community Spirit Award

*YCIT UGS Institution Dedication Award

*Black Engineer of the Year Award

*MTA Community Hero Awards

*Journal of Engineering Technology Award

*Challenge X Bronze Sponsorship Award

*WESL Community Leadership Award

*NAM Membership Award

*Jilin University APP Partner Award

*Guangxi University APP Partner Award

*Michigan Chamber Appreciation Award

*United Way of Greater St. Louis Award

*SSM Cardinal Glennon Appreciation Award

Congratulations!

SIGNS OF INNOVATION:

Adding value through industry, academic, government and community leadership

Global opportunities in Product Lifecycle Management (GO PLM)

The UGS GO PLM™ Program was developed to address the essential business issues our customers face, including the shrinking supply of skilled employees as well as the gap between current worker skills and the level of performance required in today's global manufacturing market. The GO PLM initiative covers five key education and community development programs: Academic Partnership, Youth Development, Regional Productivity, Community Relations and PACE (Partners for the Advancement of Collaborative Engineering Education). UGS views this effort as so important that we committed software and services with a commercial value of more than $2B in 2005.

Developing a workforce experienced in both innovative thinking and efficient production practices is critical. Moreover, training in PLM technologies and processes can deliver the results that concern manufactures most today. UGS is proud of its industry leadership in this area. Today we serve more than 8,400 GO PLM Partners worldwide that collectively train 860,000 students on UGS PLM software each year. GO PLM is a sure sign an organization is on the road to innovation. We encourage you to explore the ways GO PLM might benefit you.
