Summary

Siemens Learning Advantage is a convenient, easy to use e-Learning portal that provides cost- and time-effective methods for users to gain skills/knowledge of Siemens PLM Software solutions. It contains an unparalleled library of self-paced courses and assessments, as well as management tools for companies to measure learning progress and to administer learning programs.

Business value

Siemens Learning Advantage is a scalable training solution you can use to measure your company's training investment. Self-paced courses provide on-demand learning. Flexible pricing addresses the needs of individual users or your entire enterprise. Customer testimonials demonstrate significant increases in productivity while minimizing time away from work and the cost of classroom training.

Competitive advantage

Siemens Learning Advantage courses present consistent methods and concepts approved by Siemens PLM Software. Our course development teams work closely with our software product developers to ensure that prescribed processes reflect the intended product usage and industry best practices. No other training provider can make this claim! And because our learning products are coordinated with Siemens PLM Software product releases, you can be confident that training will be delivered in time for your upgrade.

Using Siemens Learning Advantage

Siemens Learning Advantage is easy to use, requiring only a standard internet browser. Memberships provide users with direct access to courses in the library, which automatically updates as new courses and versions become

PLM Software

SIEMENS

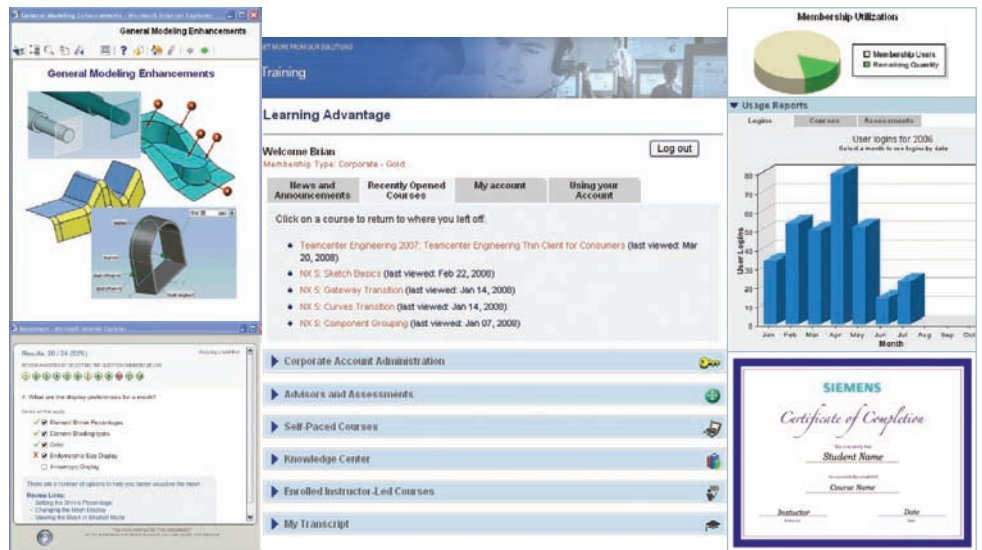

Siemens Learning Advantage

Features *continued*

- Individual and corporate memberships
- Knowledge Center content including new multimedia lessons and technical Siemens PLM Software white papers
- Corporate administration accounts that enable companies to most effectively manage membership capacity

Technical features

- Simple user interface – single click course launch – no cumbersome course acquire process
- Text search to locate information within a course
- User-defined bookmarks to aid organization
- Online help for each course
- Learning management system to track and record student progress through each course and assessment
- Downloads to support interactive activities
- Self-assessment tools including powerful dynamic review learning cycles that are learner-unique and automatically created when a learner completes an assessment

available. The library is logically organized, and simple navigation enables users to browse topics of interest. Assessments enable users to test their knowledge, review answers and take links back into courses for further study. Users can start and stop courses whenever they want, bookmarking them for convenient access. The learning management system enables tracking and reporting to measure learning progress.

Highlights of the Siemens Learning Advantage

Comprehensive library – The Siemens Learning Advantage library offers self-paced courses for a broad range of Siemens PLM Software products. Learning modules are conveniently packaged. Your membership provides convenient access to courses, from introductory to advanced topics.

Update training – To maximize the return on your investment, you need to keep pace with the latest Siemens PLM Software technology. Our update training provides the skills and knowledge to ensure ongoing success, putting your valuable time to good use. The Siemens Learning Advantage library contains several product releases so you can preview the next release or review recent enhancements at your convenience.

LIVE! Online course access – Your Siemens Learning Advantage account captures your enrolled LIVE! Online events and provides

convenient, direct access to the virtual classroom and online course materials (hands-on activities and part files). Upon completion of the course, your transcript will include a record of the class and provide an electronic, printable certificate.

Knowledge assessments – To evaluate your application knowledge and skills, we offer a variety of assessment tools. You can use pre-assessments to measure your overall knowledge and to find out if you meet the prerequisites for advanced training or certification testing. Role-specific skill assessments evaluate your skill set and recommend a training program to enhance specific skills.

Knowledge Center – Multimedia recordings of product demonstrations, technical technical references, Siemens PLM Software white papers and conference materials with online workshops are just a few of the resources now available in our Knowledge Center. New and exciting content is added on a regular basis to the Knowledge Center, providing a new dimension to the online resources that we provide.

Memberships – Learning Advantage memberships provide the ultimate value in learning. Memberships are aligned with Siemens PLM Software product lines and offer a complete library of learning

solutions. Memberships renew on an annual basis, and provide uninterrupted access to your learning assets while reducing ongoing training costs.

- *Gold membership* – includes unlimited annual access to all standard self-paced courses and assessments listed in the Learning Advantage library.
- *NX membership* – includes unlimited annual access to all standard NX™ software self-paced courses and assessments listed in the Learning Advantage library.
- *Teamcenter membership* – includes unlimited annual access to all standard Teamcenter® software self-paced courses and assessments listed in the Learning Advantage library.

Corporate membership – includes an Administration account that enables companies to manage users as well as distribute memberships across their user community. Capabilities include:

- *Manage users* – Administrators can create new accounts and assign memberships to provide access to new employees, or delete user accounts and redistribute memberships when employees leave the company.
- *Track memberships* – Administrators can track membership utilization to show the number of memberships purchased against the number currently assigned, and track usage rates to identify user logins and course consumption.
- *Report learning progress* – Administrators have access to reporting tools that display both aggregate results and individual employee metrics for completed assessments so that progress is tracked as courses are completed.
