The manufacturing industry is challenged to remain compliant and accelerate production in a lean environment. Surface takes your business one step further - it’s small enough to be mobile, powerful enough to chew through ever-increasing amounts of data, and big enough to get work done.

**Design Review Collaboration**

Being tethered to a desk is neither fun nor productive. With Surface, designers and product managers are free to move onto the factory floor, share and collaborate with integral team members, and can still view and edit complex design files.

- Surface Pro 3 runs Windows desktop apps
- Surface Pro 3 is the ultimate workhorse with Intel® Core™ processor
- Edit designs and take notes with the Surface Pen
- Connect to an external monitor using the Mini DisplayPort

**On the Warehouse Floor**

Your workers and supervisors need great tools to manage production on the floor. Surface devices fit seamlessly into your existing Windows environment and offer multiple input options – keyboard, touch, pen or mouse. Set Surface near each station or affix it to be permanent or event “checked-out” with incredible 3rd party accessory options.

- Durable casing for working in tough environments with great 3rd party accessory case options
- Interact using the touchscreen, keyboard Covers, mouse, or pen
- Instant-on means work gets done faster
- Surface Pro 3 runs Windows desktop apps

Activate Field Workers

Field workers need durable, reliable, and easy-to-carry equipment that will connect them to the warehouse or office. Surface allows field workers to access data and corporate files in real-time within a secured environment. Teams can solve problems efficiently with seamless collaboration and real-time contact, despite loud working environments or dispersed teams.

Ultra-durable casing for working in tough environments

Interact using the touchscreen, keyboard Covers, mouse, or pen

Instant-on means work gets done faster

Surface is designed to be lightweight with long battery life for ultimate mobility

“Best Product of 2013: Microsoft Surface Pro 2
There have been a lot of great products released in 2013. However, none of them set the standard for the future of computing devices as much as the Surface Pro 2 does.”

Device Stand
Maroo’s no-slip stand is ideal for supporting Surface desktops. The adjustable height and viewing angle makes it great for multiple workers throughout the day and the base accessory tray keeps desktops organized and uncluttered.

Protective Mobile Sleeve
Mobile sleeves—like the Incipio Capture case w/ convenient 360-degree rotating handle and adjustable strap—provide peace of mind in the manufacturing world.

Work Station Kiosk
Enclosures like these from ArmorActive provide opportunities to secure the device as a workstation kiosk. Assigned Access can also lock down apps and help guarantee greater security.
