

IoT und künstliche Intelligenz für die Steigerung der Produktivität bei Automobilzulieferern

Harald Lösch & Stefan von Wittgenstein

Siemens Cloud Solutions / MindSphere IoT

SIEMENS
Ingenuity for life

MindSphere is designed and developed by Siemens for IoT in Industrial Environment.

Siemens provide Solutions for Electrification, Automatization and Digitalization. IoT and Cloud is fundamental core technology.

Siemens is committed to open standards.

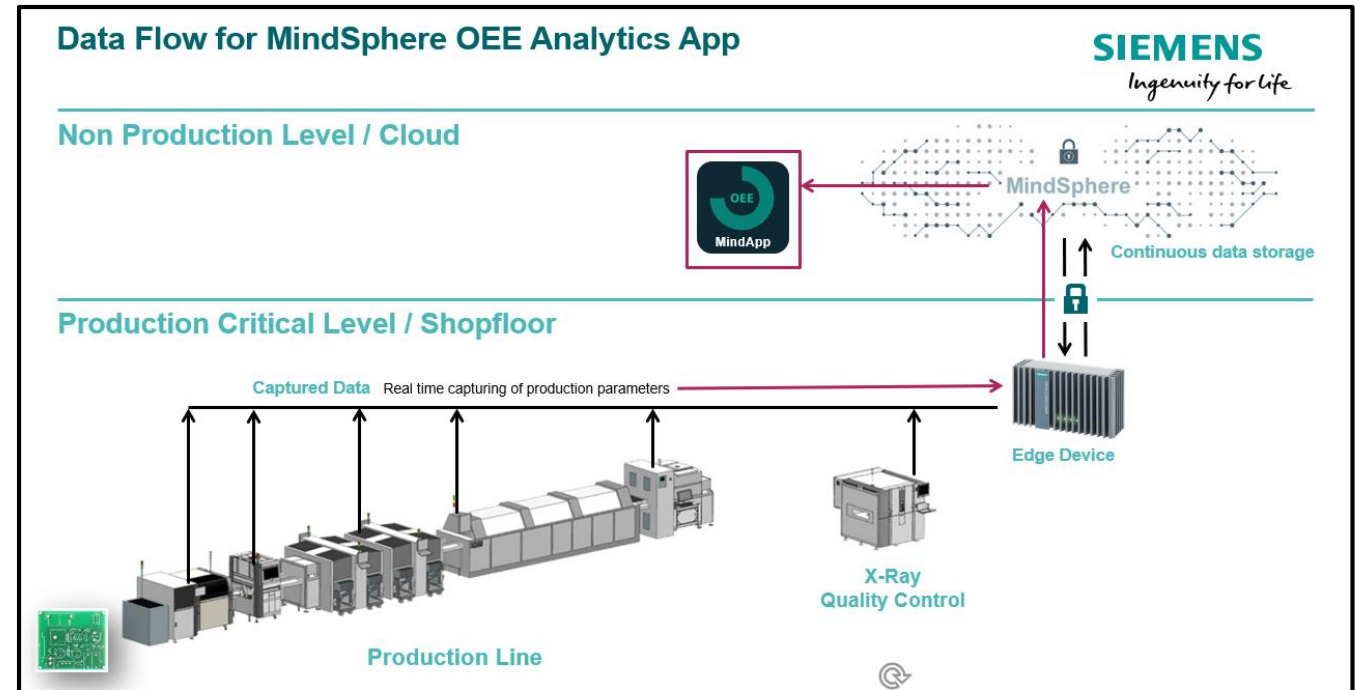

Siemens support heterogeneous manufacturing environments.

Industrial Edge Technology is key for future solutions.

IoT in Automotive Supplier Industry Line Monitoring & Data Driven Decision Making

1. Line Monitoring

... get IoT Data
from production line
to perform ...

2. Data Driven Decision Making

Bold. Committed. Open Minded.

Siemens AI Lab

The platform for AI based innovation projects and community exchange

Projects

You want to learn about AI?

Orientation Workshop

- » See the big picture of AI opportunities
- » Identify your very own use case
- » Learn what it takes to get started

8 hours

Format: Team Workshops

You want to build something with AI?

Acceleration Sprints

- » Bring your very own use case
- » Work with a committed team of experts
- » Fail fast or win big

5 days

Format: Coding Sprint

You want to break new grounds in AI?

Exploration Research

- » Dive into unexplored fields of AI
- » Work with top-level research interns
- » Generate scalable research results

9 months

Format: Researcher in Residence

Events

Inception Exchange

Stay in touch with an AI-soaked future

Discuss new chances and emerging tensions

Create joint opportunities

Hackathons, Meetups & Talks, Open Events

AI Lab Enablers

AI Experts

Business Experts

Integration Experts

Innovation Experts

AI Lab Key Topics

Deep Learning

Natural Language Processing

Knowledge Graphs

Reinforcement Learning

Data Analytics

Predictive Maintenance

Chatbot/Virtual Assistant

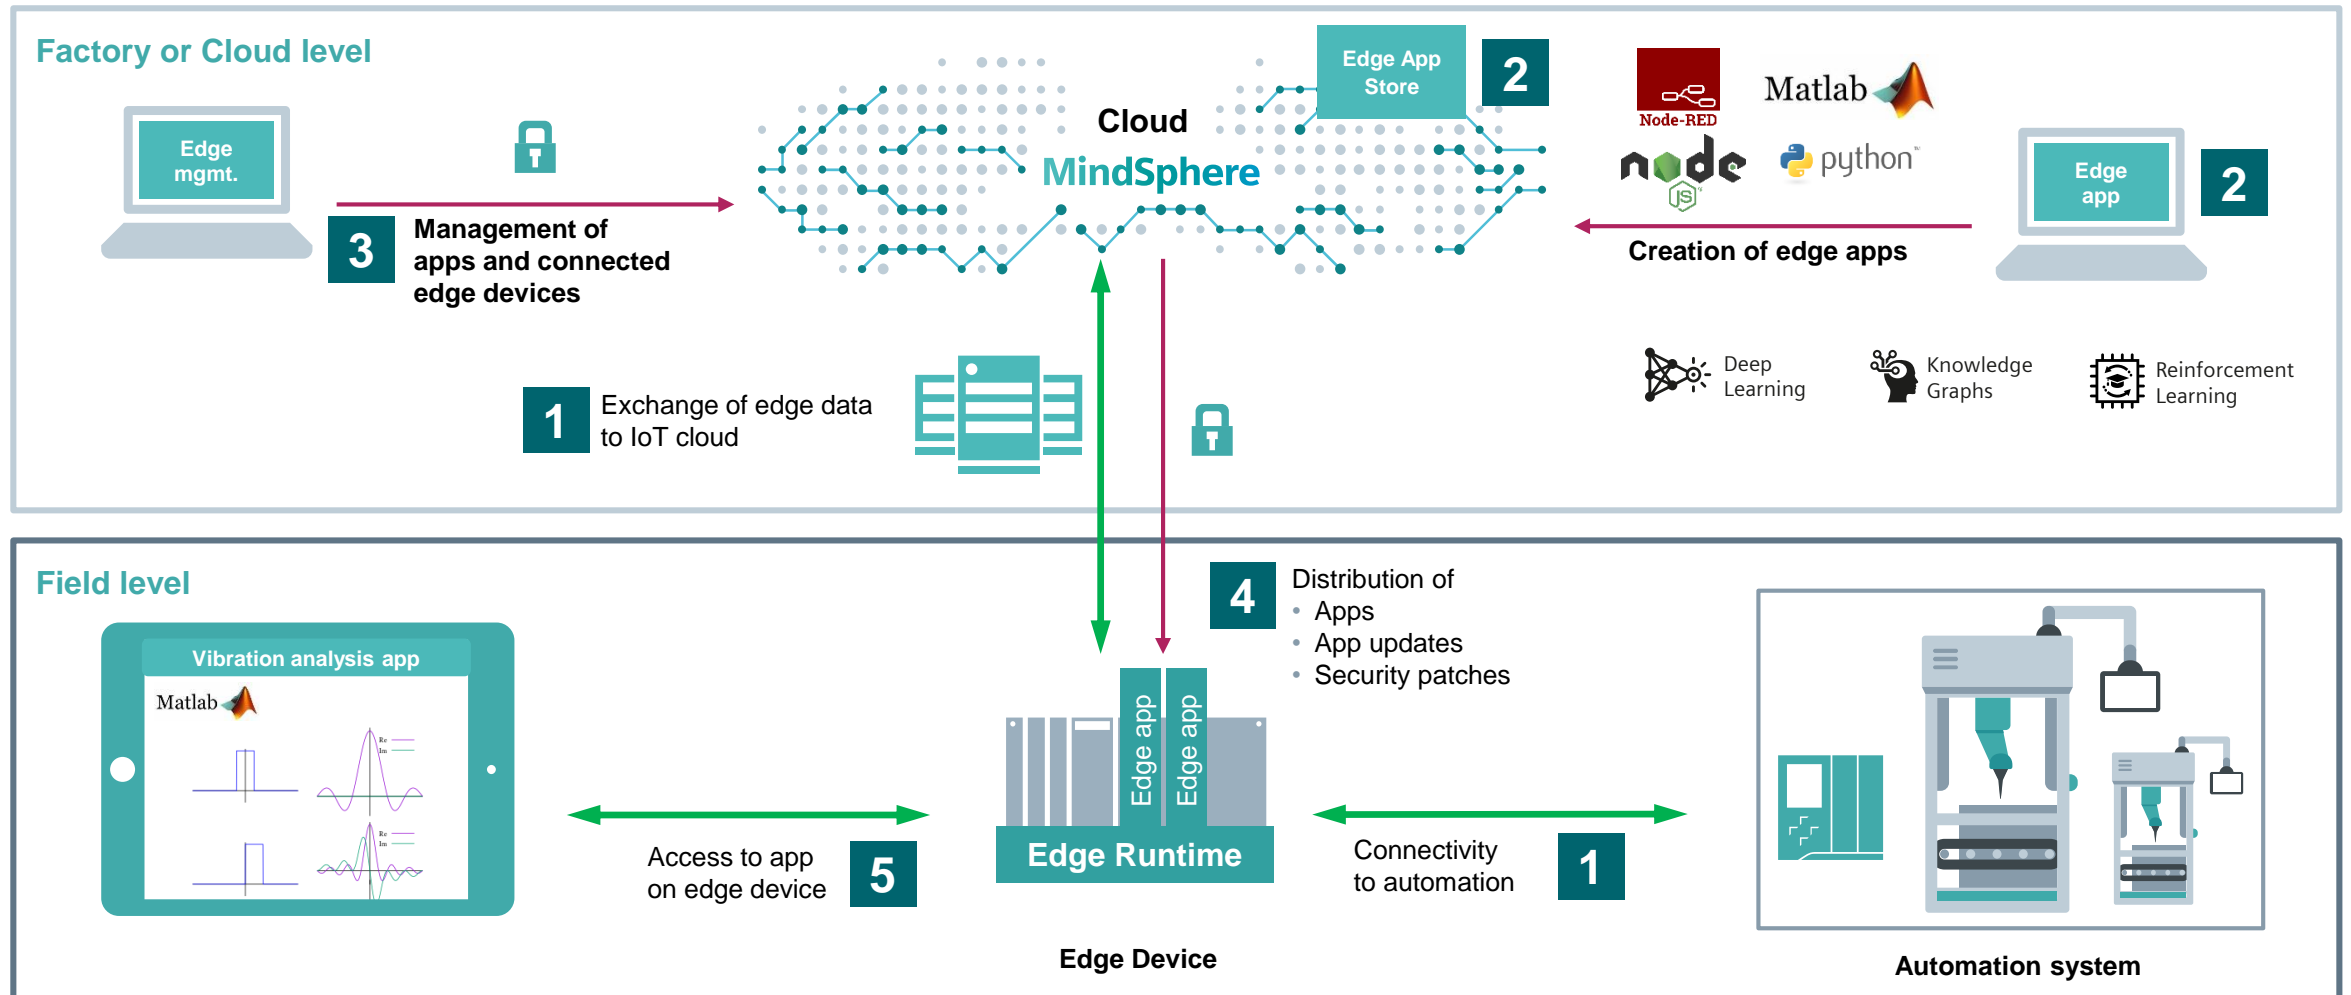

Responsible AI

Big Data

Use Case: Siemens Industrial Edge Operations Management Overview

MindSphere IoT Solutions Capabilities: Line Monitoring & Data Driven Decision Making

Line Monitoring

OEE Calculation (real-time, global) / Digital Machine Logbook
Performance Monitoring / Alarm Handling
Campus Network (5G, 4G Advanced, Narrow-Band IoT)

Data Driven Decision Making (Artificial Intelligence)

Quality Control based on Production Parameters
Identify Root Cause of Failures
Predictive Monitoring / Avoid Unplanned Stops

MindSphere – How we start

SIEMENS
Ingenuity for Life

SIEMENS

Manage MyMachines

Manage MyMachines from Siemens Motion Control leverages expertise in machine tool operations in state and conditions including alarms.

Learn More >

SIEMENS

SIMATIC Performance Insight

Improves machine productivity for various industries with worldwide access to machine data to visualize machine conditions that help improve productivity.

Learn More >

SIEMENS

Analyze MyPerformance /OEE-Monitor

Observe your machine utilization and increase its performance with Analyze MyPerformance /OEE-Monitor.

Ready to Use Solutions in MindSphere App Store

SIEMENS

Manage MyMachines

Manage MyMachines from Siemens Motion Control leverages expertise in machine tool operations in state and conditions including alarms.

Learn More >

SIEMENS

Manage MyMachines /Remote

Faster problem solving through remote machine tool access.

Learn More >

SIEMENS

Manage MyMachines /Spindle Monitor

Extension to Manage MyMachines enabling main spindle unit specific data collection and visualization.

Learn More >

SIEMENS

Analyze MyPerformance /OEE-Monitor

Observe your machine utilization and increase its performance with Analyze MyPerformance /OEE-Monitor.

Learn More >

SIEMENS

SIMATIC Notifier

Reduce reaction times and downtimes by monitoring your assets and sending notifications right to your staff's pocket.

Learn More >

SIEMENS

SIMATIC Performance Insight

Improves machine productivity for various industries with worldwide access to machine data to visualize machine conditions that help improve productivity.

Learn More >

SIEMENS

SIMATIC Energy Manager

Increase energy efficiency and reduce energy costs using different analytics for consumption.

Learn More >

SIEMENS

SIMATIC Machine Monitor

Track your maintenance intervals and monitor the productivity of your connected production machines for an optimized machine service.

Learn More >

SIEMENS

Predictive Learning

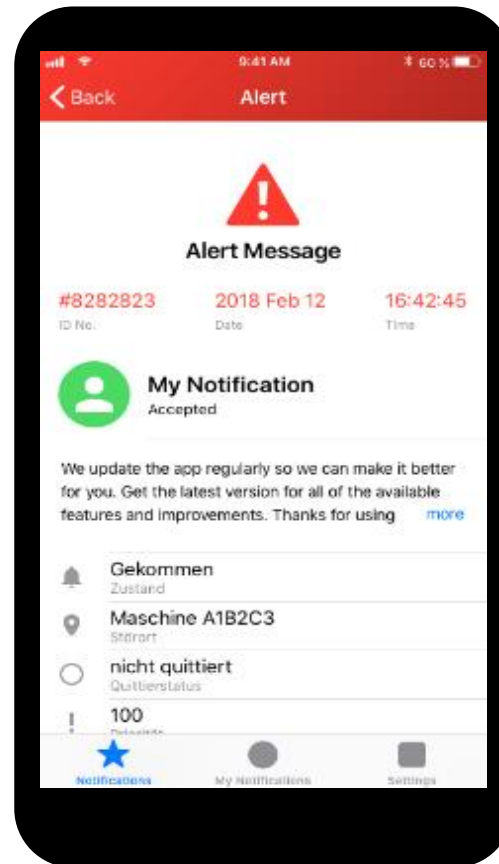

Schedule predictive maintenance, predict product performance and increase operational efficiency.

Learn More >

<https://www.dex.siemens.com/mindsphere/Applications>

SIMATIC Notifier

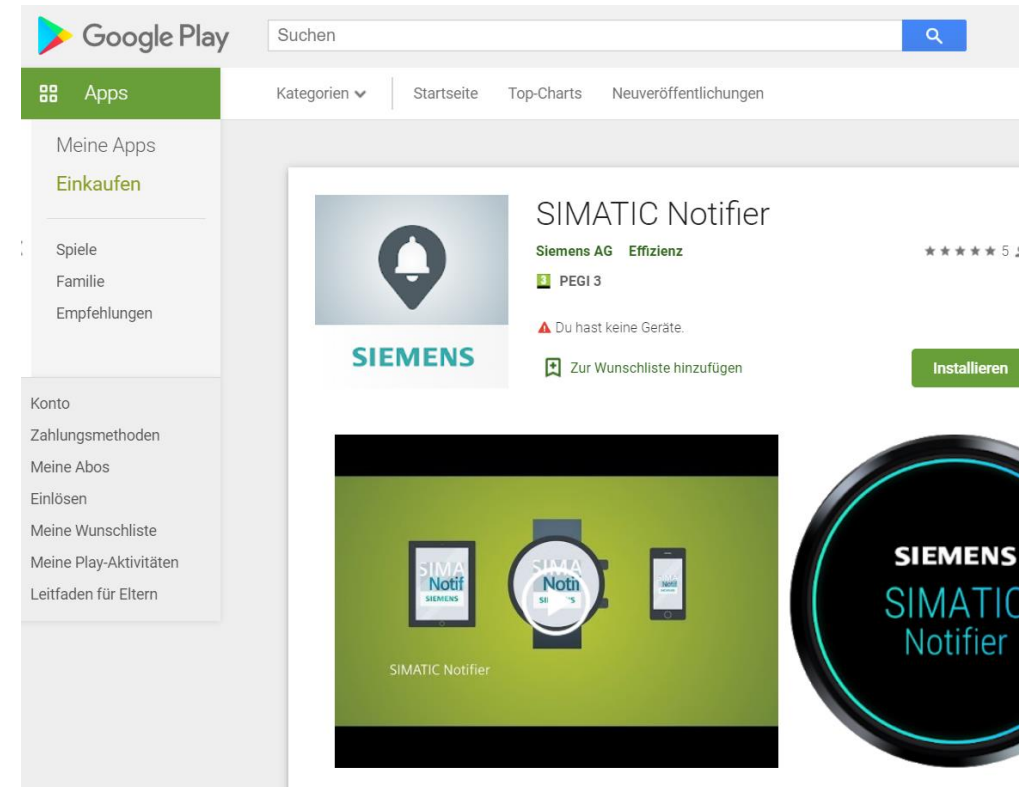

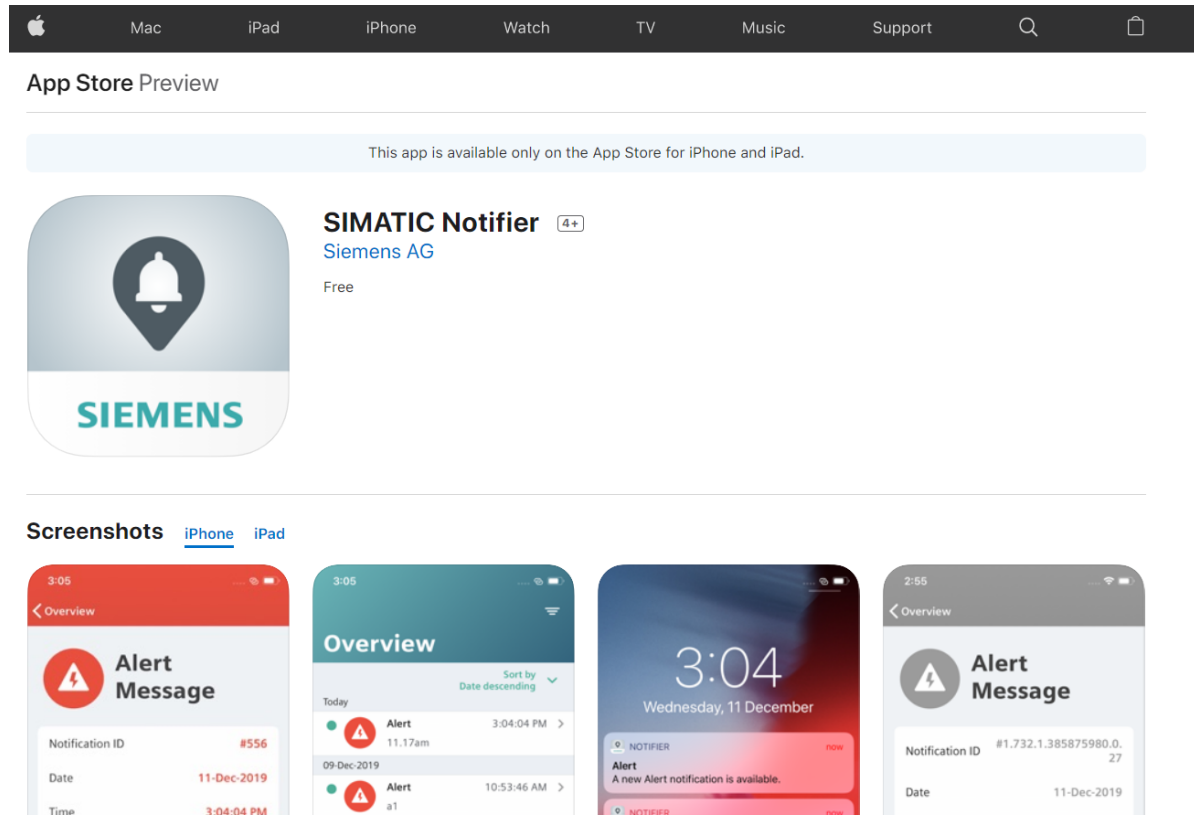

Receive push notifications on your Smartphone

Functionality

- Notifications “to go”.
- View and handle notifications on your mobile device.
- Receive and track notifications based on individual configured messages e.g. info, warning and alert

Notifier Mobile App available in App Stores Apple App Store and Google Play

The Leading Low Code Platform for the Enterprise

Build better apps faster while relieving pressure on IT resources

Model-driven Development
Visual modeling is 10x faster

Business & IT work together
Built for Citizen Developers, Engineers and Pro Developers

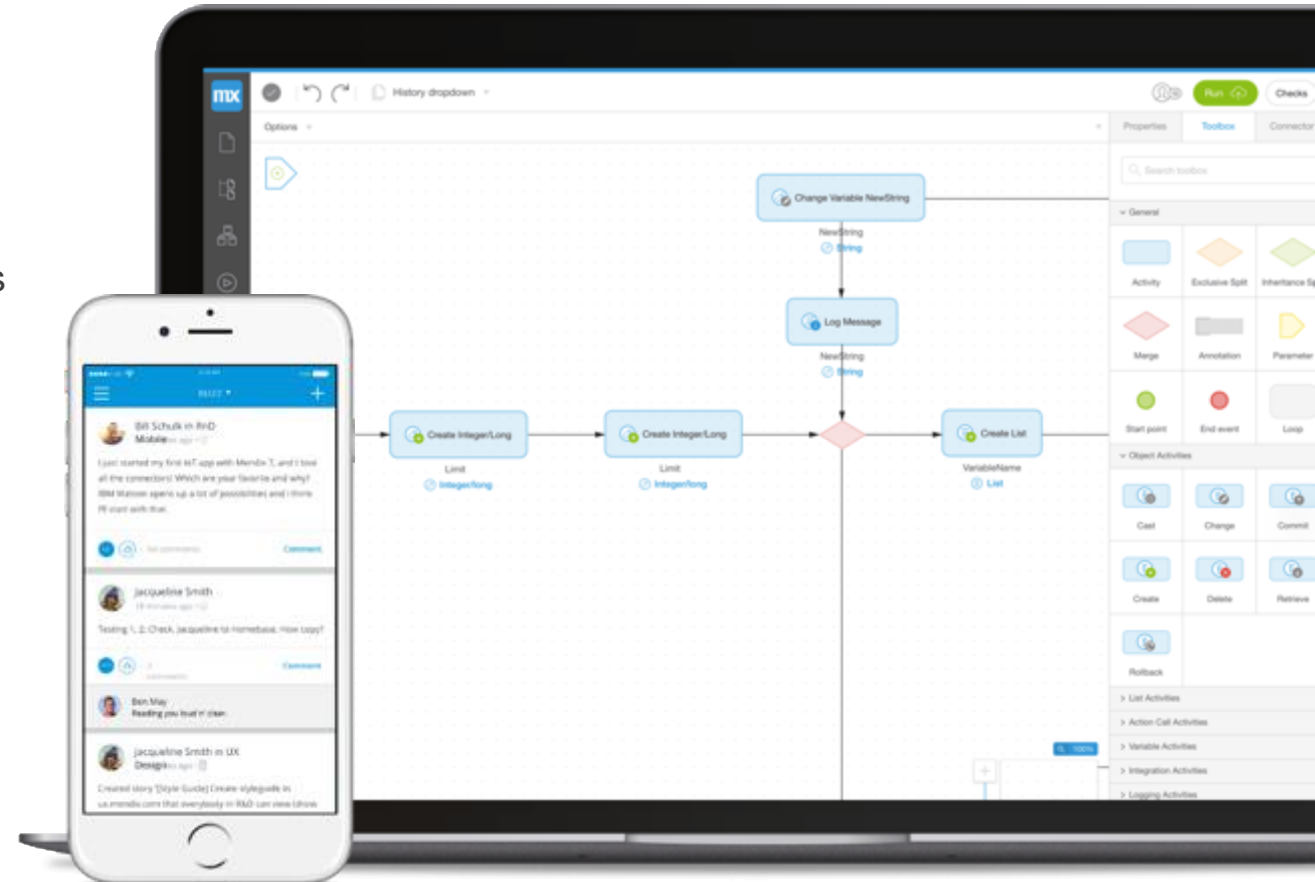

Multi-Experience
Cloud-native, API-first, smart, any device, any channel

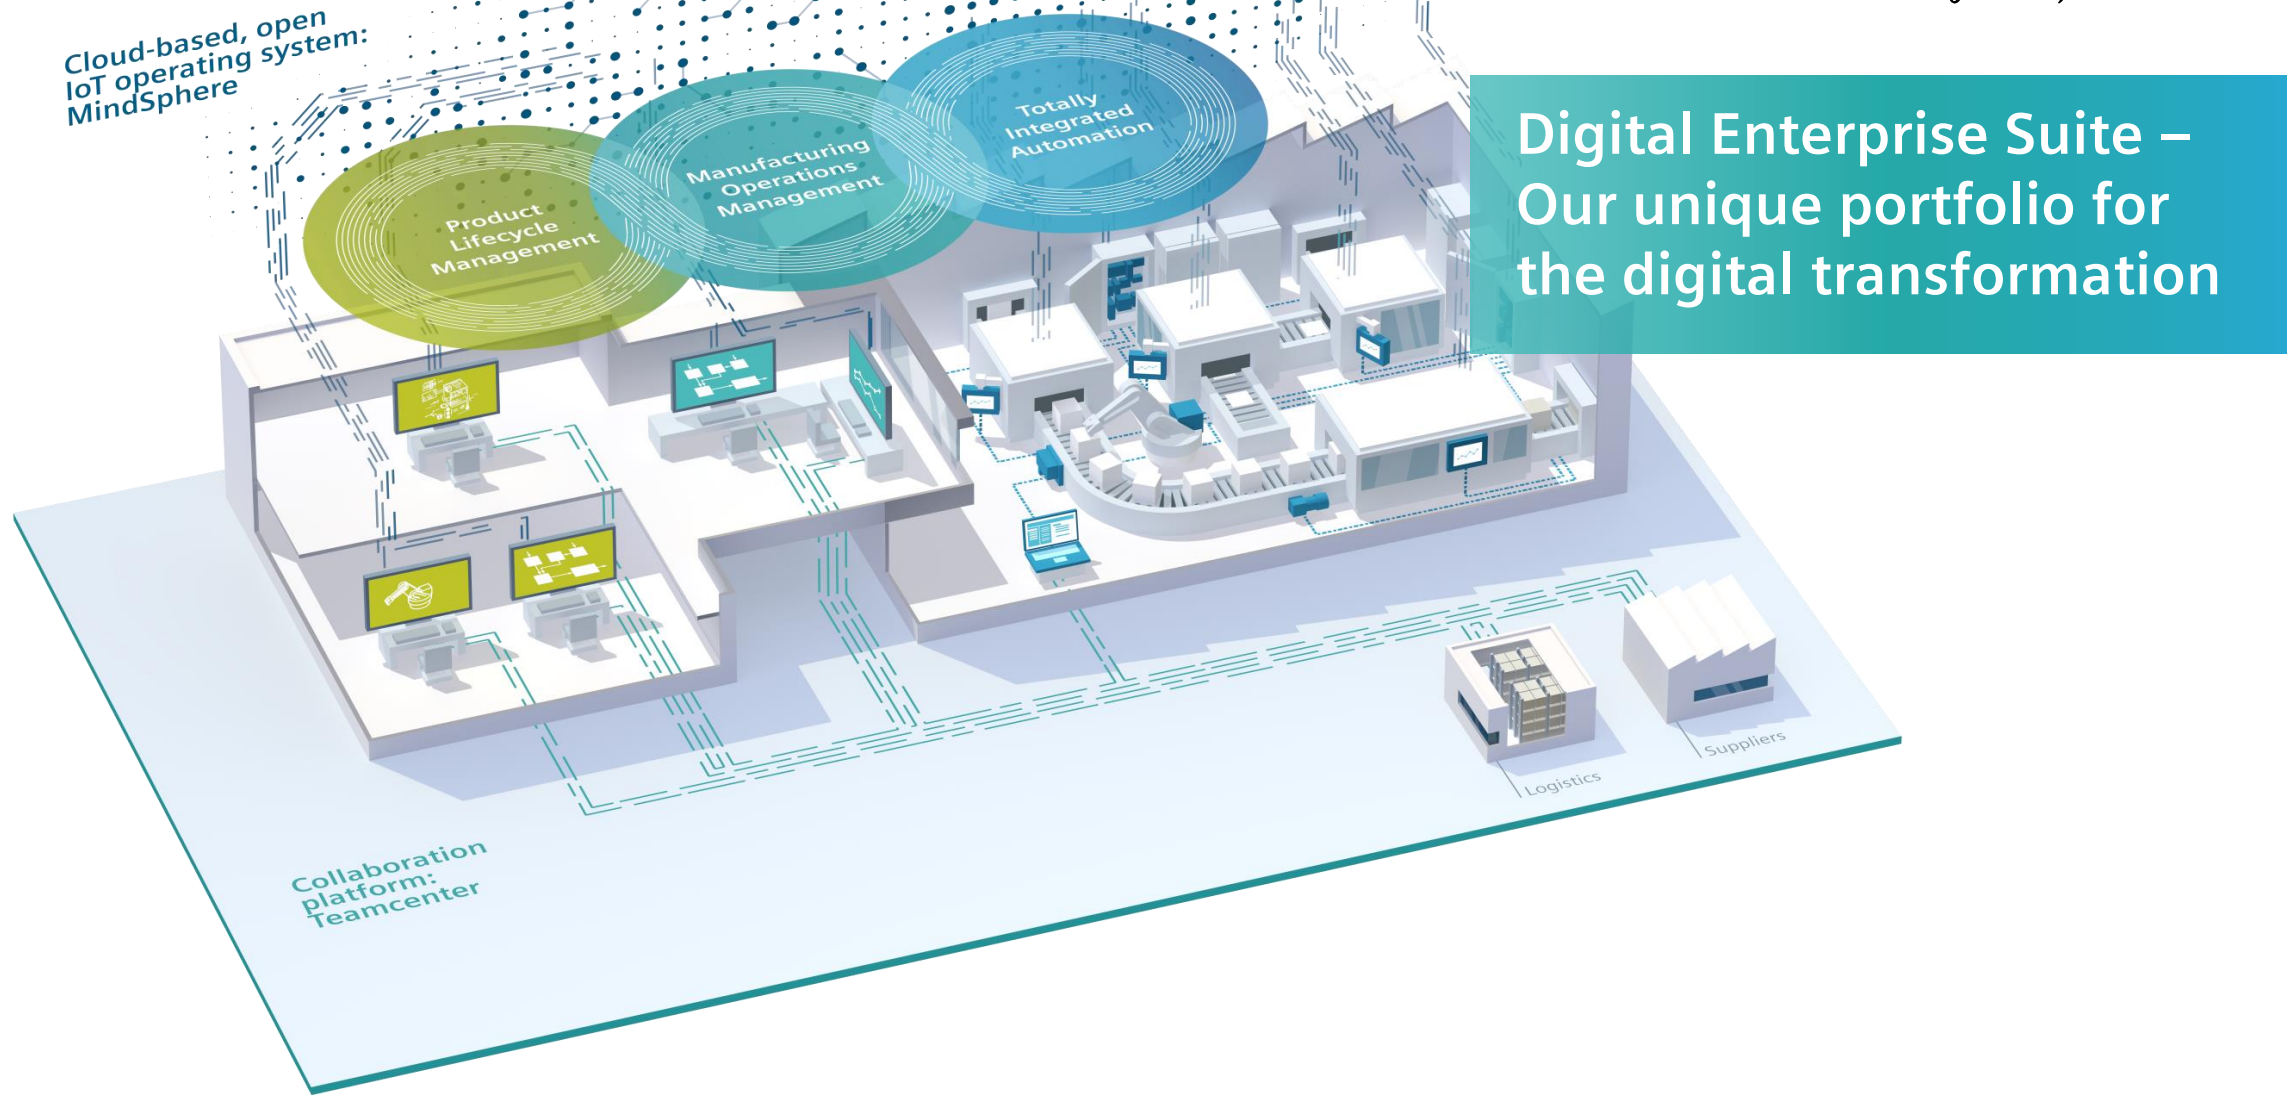

Deploy to *any* cloud with a single click
No time waiting for environments to be provisioned

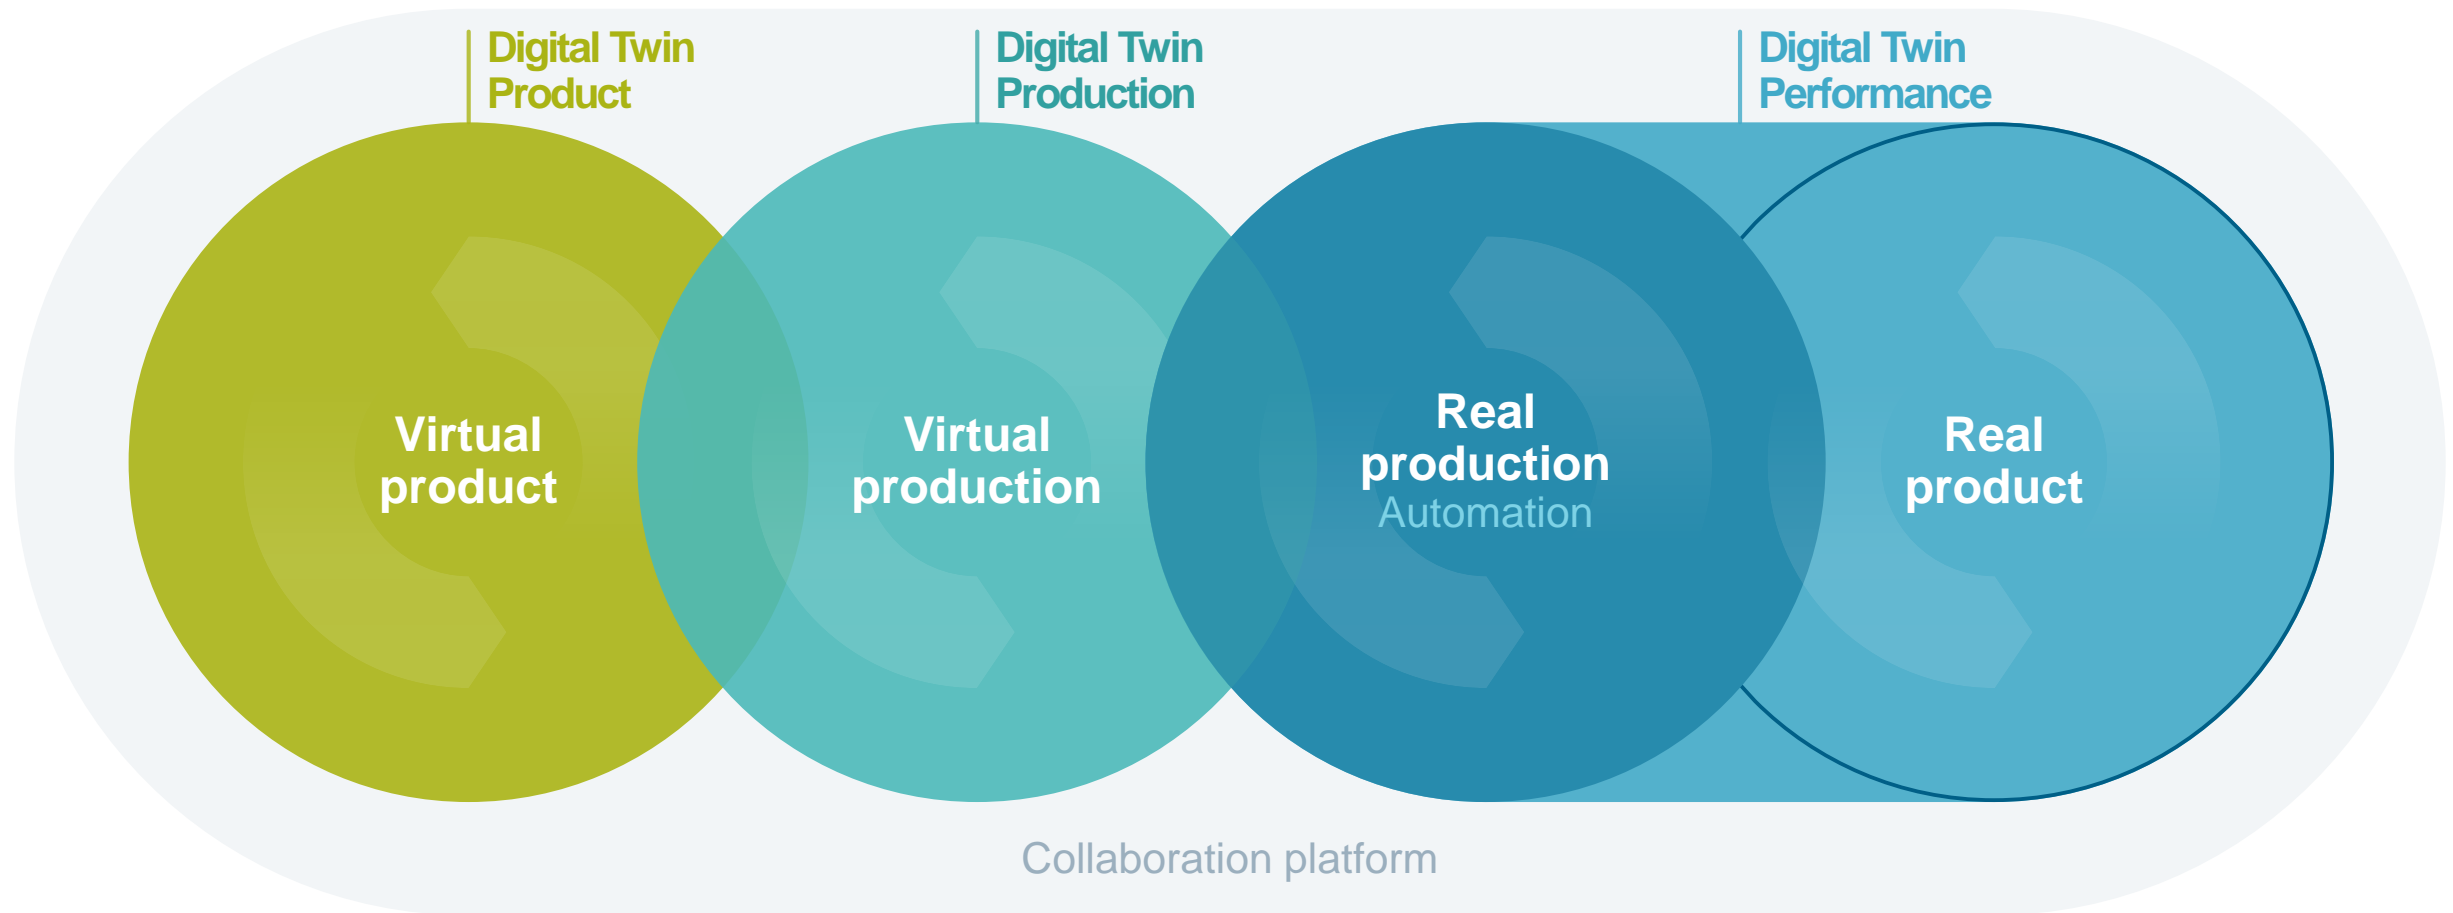

Maximize re-use
Enforce standards and go *even faster* next time!

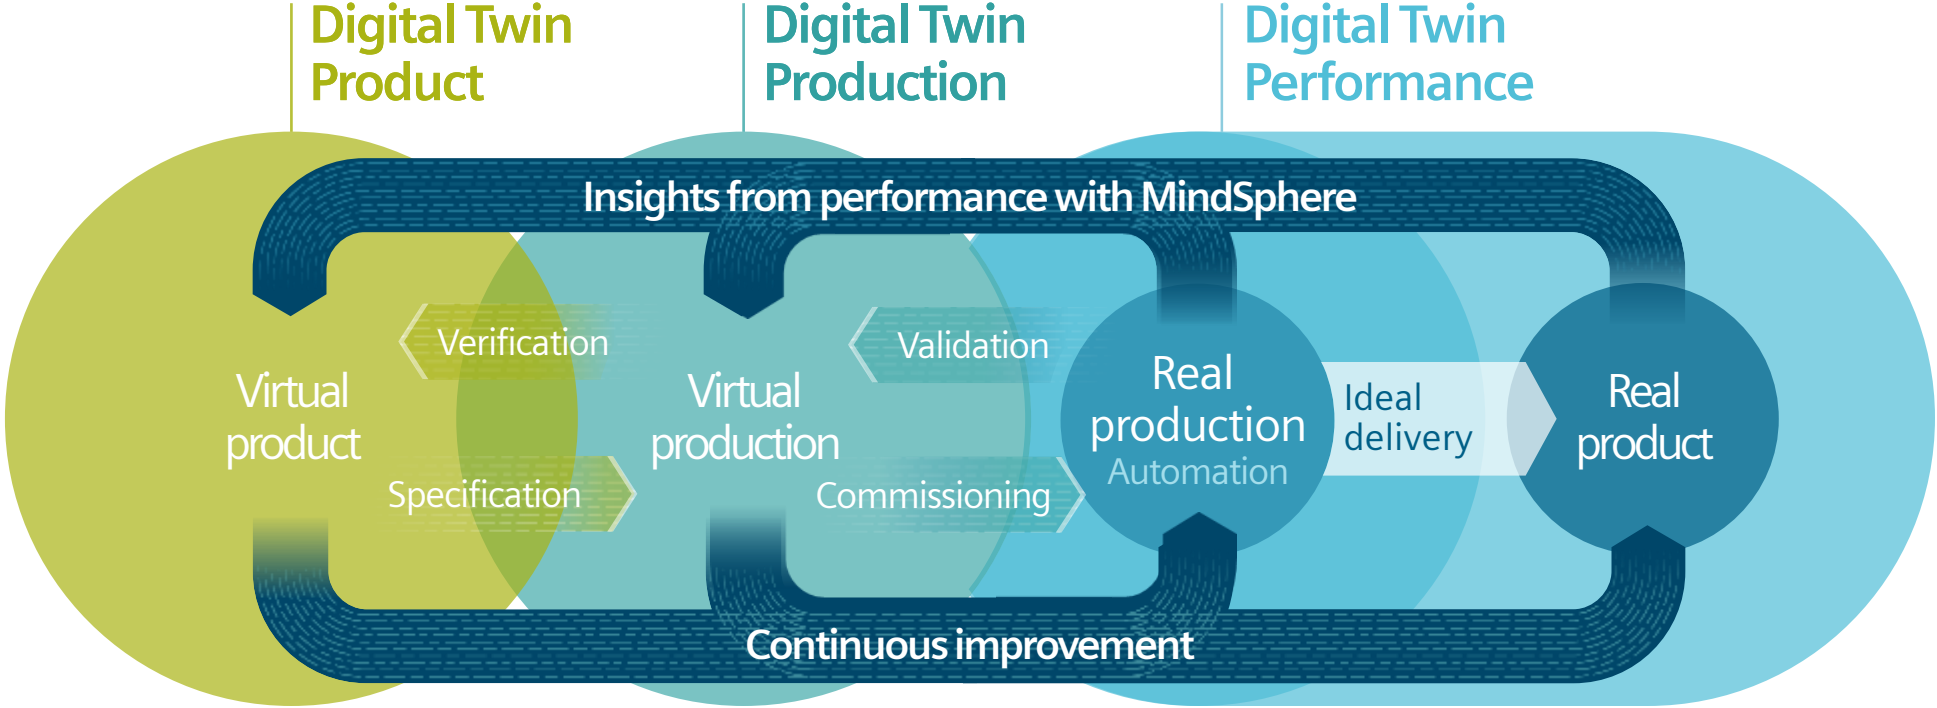

**Digital Enterprise Suite –
Our unique portfolio for
the digital transformation**

The most holistic Digital Twin

Continuous improvement with the Digital Twin

Siemens Digital Innovation Platform

MindSphere OEE Analytics

Globale OEE Transparenz mit Hilfe von MindSphere

Maschinenbedienung mit Hilfe von Künstlicher Intelligenz

Siemens Cloud Solutions - Summary

Applications

Powerful industry solutions, advanced analytics and machine learning (AI)

- Robust IoT Core System for Industrial Environment
- Serverless SaaS Solution
- Global Scalability

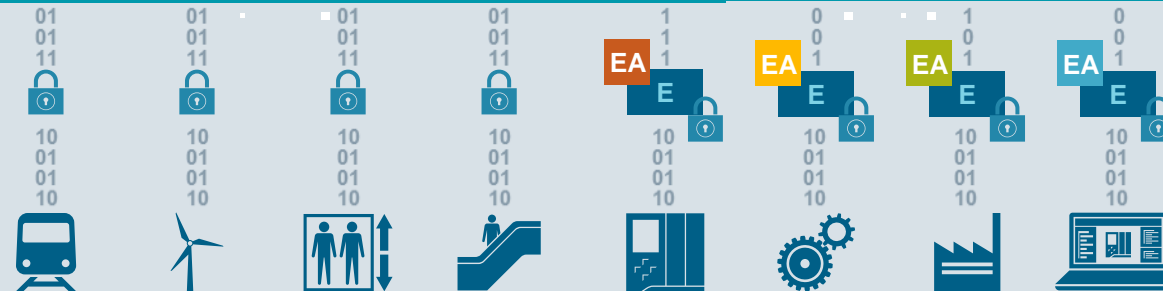

Edge Management

Edge Device Management, Edge App Management, and Edge App Store

Connectivity

Connect products, plants, systems, machines and enterprise applications (legacy databases)

Edge Apps

Siemens, partner (OEM), and 3rd-party Edge Apps

Edge Devices

Multiple enabled devices hosting the Industrial Edge platform

Digital twin of the performance – Siemens Bad Neustadt Predictive failure analysis

Context

- Electric motor plant in Bad Neustadt an der Saale is being developed as a showcase factory for digital applications in metalworking

Transformation results

- Predictive analysis of motor failures
- Increased machine uptime
- Improved maintenance processes
- Efficient maintenance schedule planning

Value

- Comprehensive robot and machine cycle production data collection
- Rich fleet Manager event and failure rules definitions
- Fast connectivity of KUKA robots to MindSphere
- Visual analysis of operations and cycle data

10%

Reduction in
downtime

Digital twin of the performance – Rittal GmbH & Co. KG Smart maintenance

Challenges

- Optimizing customer production processes and cost savings through...
 - Standard collection of operational data
 - Data analysis and the ability to understand correlations
 - Visualizations of asset performance and maintenance data

Transformation results

- Collection and transmission of data from cooling and chiller units to MindSphere
- Custom applications to increase asset transparency and leverage analytics
- Implementation of predictive maintenance to limit failures and downtime

Value

- Comprehensive, customer-centric solution that enabled:
 - Increased machine availability
 - Demand driven maintenance (vs interval driven)
 - Rapidly scalability

30% Savings in service and maintenance costs

Thank You!
