

# Daimler Add On Supplier Package B17.1 Daimler NX Tool/ AddOn „ACFO3 (DM10000)“

The support of the process format "CATIA V5" will be released by Daimler to 17.1 / NX11.0.1.11 D3 (26.06.2017) Completely discontinued in all Daimler development areas in all Daimler business units!

„ It only supports V5R19 and also compiles it. Something newer does not exist and will not give it either.

The ACFO3 is also no longer developed on the software side and thus discontinued at the end of the term (no later than 2019)“

The processes are clearly defined, delivery of the data in NX format or in the JT format depending on the KLH (component specifications) requirement, with some exceptions which are clearly defined and agreed.

Any customer who still needs the ACFO3 (CATIA V5 to NX) and to use this with more recent CATIA versions, you can ask the tool maker (Elysium) for an upgrade of an standard Product.

Dear customer, you need that ACFO3 tool no longer, so you have the opportunity to turn to your sales staff at Siemens and have the license to get credit for purchasing additional NX modules.
