MindConnect Integration training

Enable data exchanges across cloud and enterprise IT systems

Description

MindConnect Integration is the integration platform as a service (iPaaS) offering for MindSphere. The solution enables you to integrate your cloud-based software as a service (SaaS) applications with other cloud-based and on-premise applications.

This one-day training provides detailed insights into MindConnect Integration and how to easily develop and configure cloud-to-cloud integration. You will also be introduced to connecting cloud-based SaaS applications and on-premise enterprise service bus (ESB) implementations. With this hybrid integration solution, you have the power to connect anything with everything, including mainframe applications.

Objectives

This training enables you to:

- Select the most suitable MindConnect Integration solution for your business case to enable data exchange across cloud and enterprise information technology (IT) systems

- Develop and deploy your own MindConnect Integration solution that interacts with MindSphere to exchange data

Content

- Cloud-based SaaS application configurations

- MindSphere security concept

- MindConnect Integration: development of integrations

- Data exchange with MindSphere

- On-premise integration server and hybrid integration solution overview

Target groups

- Management
- Software developers
- Software architects
- System integrators

Prerequisites

- Basic programming skills

- Basic knowledge of RESTful API and database

- Laptop with USB port and ability to connect to the internet via Wi-Fi or cable

Training methods

- Interactive lectures
- Hands-on exercises

Duration

- One day
