

# Use Case Evaluation Workshop for MindSphere

## Identify the most valuable use case for your business

### Description

Review, evaluate and prioritize your existing use cases with the help of our MindServices expert to determine how MindSphere can create value across your organization. Various factors such as the business goals and challenges, the use case's business impact, effort and costs as well as the evaluation of currently available applications will be taken into account to ensure effective decision-making.

The workshop methodology has been developed by our experienced business and technical experts to ensure a complete understanding when comparing and evaluating use cases.

### Objectives

Select and further define the most promising use cases as a basis for your MindSphere solution.

### Content

- Overview of MindSphere
- Identifying business goals and challenges
- Follow a methodology designed to compare and evaluate use cases
- Technical evaluation of the use cases
- Evaluate the effort, resource, HW & SW requirements
- Prioritization of the use cases
- Next steps and considerations to develop the use cases into a MindSphere solution

### Delivery structure

Prior to the workshop, we will arrange a phone interview to discuss and collect the use cases across the business. This allows us to review the use cases and present our findings back to you in order to agree which five use cases (maximum) we will evaluate during the workshop.

### Target group

For businesses that require support in determining which use cases they should develop further as a MindSphere solution.

### Number of participants

Maximum of ten people, ideally stakeholders of the use cases

### Prerequisites

List of use cases for your business area

### Duration

- 1 day
