Summary
Learning Advantage is a convenient, easy to use e-Learning portal that provides cost effective and time efficient methods for users to gain skills and knowledge of Siemens PLM Software solutions. This system provides access to an unparalleled library of self-paced courses and assessments, as well as management tools for companies to measure learning progress and to administer learning programs.

Business value
Learning Advantage is a scalable training solution you can use to measure your company's training investment. Self-paced courses provide 24/7 access to on-demand learning. Assessment tools measure and validate application knowledge and skills. Flexible pricing addresses a wide range of needs from the individual learner to the entire enterprise. Customer testimonials demonstrate significant increases in productivity while minimizing time away from work.

Competitive advantage
Learning Advantage courses present consistent methods and concepts approved by Siemens PLM Software. Our course development teams work closely with our software product developers to ensure that prescribed processes reflect the intended product usage and industry best practices. No other training provider can make this claim! The Learning Advantage library contains several product releases so you can preview

- Powerful self-assessment tools that are individualized to a learner's needs.

the next release or review recent enhancements at your convenience. And because our learning products are coordinated with Siemens PLM Software product releases, you can be confident that training will be delivered in time for your upgrade.

Using Learning Advantage
Learning Advantage is easy to use, requiring only a standard internet browser. Memberships provide users with direct access to courses in the library, which automatically updates as new courses and versions become available. The library is logically organized with simple navigation tools so users may browse topics of interest. Assessments enable users to test their knowledge, review answers and take links back into courses for further study. The learning management system enables tracking and reporting to measure learning progress.

Learning Advantage highlights
Learning Advantage memberships are aligned with Siemens PLM Software product lines and offer a complete library of learning solutions. All memberships renew on an annual basis, and provide uninterrupted access to your learning assets while reducing ongoing training costs. Membership products may be specific to the catalog of NX or Teamcenter training courses, or you may select the Gold membership which provides unlimited annual access to all standard self-paced courses in the Learning Advantage library. You may also choose to contract Siemens to define custom

memberships that include courses authored by our world-class training specialists that capture workflows, procedures and knowledge specific to your company's needs.

Membership packages are available as three separate options:
- *Individual* – provides a membership with access to the self-paced catalog and a transcript of completions. Membership is non-transferrable and assigned to a specific user account.
- *Corporate* – provides 5 or more memberships and includes an administration account which provides functions to manage users (add, modify, delete) and transfer purchased memberships between users (which greatly extends the value of the membership). Also included are usage reports that enable administrators to track and monitor learning progress.
- *Enterprise* – provides a company unlimited access to Siemens PLM self-paced training at a contained cost which does not scale with the number of users. Enterprise Gold Membership minimizes administration by providing a quick and simple self-registration process, based on an email domain (such as @yourcompany.com), in which employees can create Learning Advantage accounts with Gold membership access to the entire standard library of self-paced courses and assessments.
